# JUNE 2020 PLANT OF THE MONTH

**Dendrobium densiflorum**  
**Grown by Tessie Steelman**

## **Tessie's advice for successfully growing Dendrobium densiflorum:**

As you can see, the picture was taken outdoors under 50% Aluminet covering, and the plant is facing east meaning lots of morning sun. For fertilizer, I use regular Miracle Gro liquid and apply once a month and frequent watering in the summer until fall. For medium, I normally use large Orchiata bark mixed with Osmocote fertilizer. In the winter, I grow this Dendrobium under high wattage LED lights with a fan running 24/7 and water only with collected rain water with the plant sitting on a tray. Once you see side shoots, make sure to keep it on the warm side and water it frequently. Never let it get bone dry.
